PROFESSIONAL SUMMARY

Front-end Developer with 6+ years of experience building scalable React.js, Next.js and React Native applications for fintech, e-commerce and SaaS. Skilled in performance, accessibility (WCAG 2.1 AA), design systems, API integration and payment flows, with full-stack experience in Supabase, WhatsApp Cloud API and AI/LLM integrations.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, JavaScript (ES6+), HTML5, CSS3, TypeScript

Data Fetching and Charts: TanStack Query, Recharts

Styling and UI: Tailwind CSS, Bootstrap, Shadcn UI, Responsive Design, Virtualization

Design and Docs: Figma, Adobe XD, Storybook

Testing: Jest, React Testing Library

APIs and Integrations: REST, WhatsApp Cloud API, Google Calendar API, Google Sheets API, Razorpay, Stripe, OAuth, Algolia

AI: AI/LLM API Integration, Vercel AI SDK, TanStack AI, Prompt Engineering, AI-Assisted Development (Claude Code, Cursor, Codex)

Backend-as-a-Service and Auth: Supabase (Auth, Database), Firebase, Clerk

Practices: Agile, Scrum, PWA Development, Chrome Extension Development, Code Splitting, Lighthouse Auditing, Client-side Caching, WCAG 2.1 AA, ARIA, i18n

Tools: Git, GitLab

PROFESSIONAL EXPERIENCE

Front-end Developer, Keuro Health and Technology LLP (Keuro Digital)

Sep 2024 - Sep 2026

Hybrid | Riyaah and OMS projects transitioned from FLOOID

- Riyaah E-commerce: delivered a multi-language e-commerce platform with Algolia-powered search, fast search response times and full English and Arabic support.
- OMS Order Management: built an admin panel for managing high-volume orders, product catalog, dynamic banners and inventory with streamlined workflows.
- Improved web accessibility to WCAG 2.1 AA standards across platforms, expanding reach and supporting inclusive design.
- Collaborated with design and backend teams in Agile sprints and delivered releases on schedule.

Front-end Developer, FLOOID

Aug 2023 - Aug 2024

Remote

- Centrum Wealth: built a fintech platform for real-time investment tracking, portfolio management and wealth analytics, with code splitting for faster page loads.
- HerKey PWA: developed an offline-first Progressive Web App for women professionals with job matching and mentorship features, achieving strong Lighthouse scores.
- EV-Ready India (OMI Foundation): designed interactive dashboards visualizing EV ecosystem metrics to support data-driven policy decisions for government stakeholders across multiple states.

Front-end Developer, Cloudberry360

Sep 2021 - Jul 2023

Bengaluru, India

- Apexx: developed and maintained an internal payment system dashboard in React.js for high-volume monthly transactions, cutting payment monitoring time with real-time data visualization.
- Built a library of reusable React components used across projects, reducing development time and keeping UI/UX consistent.
- Improved website performance on client projects, raising Lighthouse scores and reducing bounce rates.
- Delivered responsive, cross-browser websites for Chrome, Firefox, Safari and Edge.
- Converted Figma wireframes and mockups into pixel-accurate, production-ready code in close collaboration with designers.

Front-end Developer, NVEST

Sep 2019 - Jul 2021

Bengaluru, India

- Developed a Chrome browser extension for Ethereum transactions serving a growing user base.
- Improved the interface for complex crypto transactions, reducing user errors and transaction completion time.
- Integrated with the Ethereum blockchain and multiple DApps for reliable, high-success transactions.
- Implemented secure private key storage and recovery using AES encryption.
- Integrated multi-cryptocurrency payments (Bitcoin, Ethereum and others) with real-time exchange rates over WebSocket APIs.

PROJECTS

WhatsApp Doctor Appointment Agent | WhatsApp Cloud API, Next.js, Supabase, Google Calendar API, Google Sheets API

- Built a WhatsApp chatbot where patients book, view and cancel appointments using interactive lists and buttons, with live slot availability and returning-patient recognition.
- Doctors set up their account (registration number and signature) and manage the schedule from chat: view today or the week, block time, mark visits complete and send prescriptions.
- Generates a prescription PDF with a unique Rx number and the doctor's signature, delivered to the patient on WhatsApp.
- Built a Next.js and Supabase admin dashboard with a calendar view and analytics on appointments, patient status and show-up rate.
- Syncs each booking to Google Calendar and logs appointments to Google Sheets through a service account.

WhatsApp Course Enquiry and Registration Agent for an Engineering Institute | WhatsApp Cloud API, Next.js, Supabase, AI/LLM API

- Built a WhatsApp agent where students browse 66 courses across 6 categories and view complete course details in chat, with AI-generated answers to follow-up questions based on the course data.
- Built the student registration and course enrollment request flow, with an optional, admin-configurable registration payment (Rs. 99 by default). After the admin verifies the payment, the student receives a 10% discount coupon and the amount is deducted from the enrollment fee.
- Every registration, paid or not, is followed by a call from the institute to guide the student.
- Built an admin panel with full control and configuration: registrations, payment verification, coupons, enrollment requests and the registration fee.

EDUCATION

Master of Computer Applications (MCA), New Horizon College of Engineering, Bengaluru - 2018

Bachelor of Computer Applications (BCA), Asian Institute of Management and Science, Guwahati - 2014
